#M2WBK-5.5 - Installation Instructions
Mustang II Disc Brake Kit with 5x5.5 lug pattern

Instructions:

1. Using the 1/2-20x2-1/2” bolt and a 1/2” lock washer, loosely attach the upper anchor to the upper brake boss on the spindle.

2. Using the 1/2-20 nut, ¼” flat washer and ½” lock washer loosely attach the caliper bracket to the upper anchor. The flat portion of the caliper bracket should be near the flat portion of the upper anchor.

3. Using the 7/16-14x2” bolt and spacer, attach the lower portion of the caliper bracket to the lower brake boss on the spindle. Tighten the caliper bracket and anchor hardware. See the diagram for caliper and bracket mounting details.

4. Pack the wheel bearings with grease. Install the inner bearings and grease seal into the hub. Slide the hub assembly over the axle pin. Install the outer wheel bearing, washer and spindle nut. Adjust the wheel bearings as follows:
   a. Tighten the nut only slightly (no more than 12lb/ft.) spin the hub in a forward direction to ensure the bearings are fully seated.
   b. Check that the spindle nut is still tight. If it is not, repeat step a.
   c. Loosen the spindle nut until it is just loose.
   d. Hand tighten the spindle nut, install the nut cage, and install the cotter pin. Do not use a wrench! If necessary loosen the nut to the first position the cotter pin can be installed into.

5. Slide the rotor over the wheel studs and hub assembly.

6. Install the caliper assemblies. The bleed screws will be towards the top. Torque the caliper mounting bolts to 35 lbs/ft.

7. Check that the rotor can turn freely and that the brakes do not drag. Install the spindle dust caps.

Parts List:

- 2 ea Caliper Bracket
- 2 ea Upper Anchor
- 2 ea Lower Spacer
- 2 ea Caliper Assembly
- 2 ea Caliper Hose
- 2 ea Hub Assembly
- 2 ea Brake Rotor
- 2 ea Grease Seal
- 2 ea Inner Bearing
- 2 ea Outer Bearing
- 4 ea Spindle Washer
- 2 ea Spindle Nut
- 2 ea Nut Cage
- 2 ea Cotter Pin
- 2 ea Bearing Cap
- 2 ea Brake Hose
- 2 ea 7/16-14x2 Bolt
- 2 ea 7/16 Flat Washer
- 2 ea 7/16 Lock Washer
- 2 ea 1/2-20x2.5 Bolt
- 2 ea 1/2 Flat Washer
- 4 ea 1/2 Lock Washer

Please note: The installer needs to make sure that nothing can make contact with a brake hose, caliper, or other brake component at any point through the entire range of steering and suspension movement. The installer also needs make sure none of the steering or braking components can become bound or jammed at any time through the range of suspension or steering movement.
